Delivery trend

Area	State	Trend	Owner
PDF layout rhythm	Good	+12%	OfficeIMO.Pdf
Table wrapping	Watch	-3%	Renderer
Read/manipulation	Growing	+31%	Core
Word/Excel export path	Planned	+0%	Roadmap

Narrative

The dashboard deliberately avoids a domain-specific report object. It uses the same primitive surface that a Word, Excel, or PowerPoint exporter could target later: page setup, rows, tables, paragraphs, shapes, and themes.

- Rows keep gutters as layout state.
- Tables use explicit widths and numeric alignment.
- Vector drawing comes from OfficeIMO.Drawing descriptors.
- Visual gates can rasterize the result and catch rhythm regressions.

Next decisions	
Visual fixtures	Keep generic, use documents as gates
AST model	Promote page/content tree over helper-only APIs
Conversion	Add Word/Excel/PPT exporters in slices
